

VAS Tracker

Product	Jan Michael Valle
BE Engineer	Niranjan Gupta
Status	Dev in progress
# FE Effort	10
# BE Effort	10
Sprint(s)	15/05
Area	Fulfillment
Sprint Start	May 14, 2023
Sprint End	May 27, 2023
Planned Launch	@June 16, 2023
Affected Module(s)	Partner Hub
Project	VAS

Problem Statement:

Solution:

VAS Tracker

VAS List

View VAS

Add Outbound/Other VAS request

I. Request for VAS

II. Add VAS activities and submit

Inbound VAS

I. Request for VAS

II. Add VAS activities and submit

Status Flow

I. Approve / Reject VAS

II. Complete VAS

III. Verify VAS

III. Billing and payment flow

High level flow

Notes

Problem Statement:

VAS is currently done offline via email/google sheets which risks VAS not being tracked and billed properly.

Solution:

Users will be able to add any non-standard VAS in Partnerhub

VAS Tracker

▼ VAS List

View details
Approve
Reject

When the user clicks View details or the reference number, it will redirect to the VAS details page.

To approve the VAS request, do the following:

1. Click the Approve button
2. Tick the checkbox whichever applies:
 - Payable by brand. Locad will bill the brand for this VAS.
 - Payable by Locad. The warehouse will bill Locad for this VAS.
3. Click the Approve button

To reject the VAS request, do the following:

1. Click the Reject button
2. Select from the following reasons of rejection:
 - Missing information
 - Incorrect quantity
 - Incorrect VAS activity
 - Others
3. [Optional] Add remarks
4. Click the Reject button

II. Complete VAS

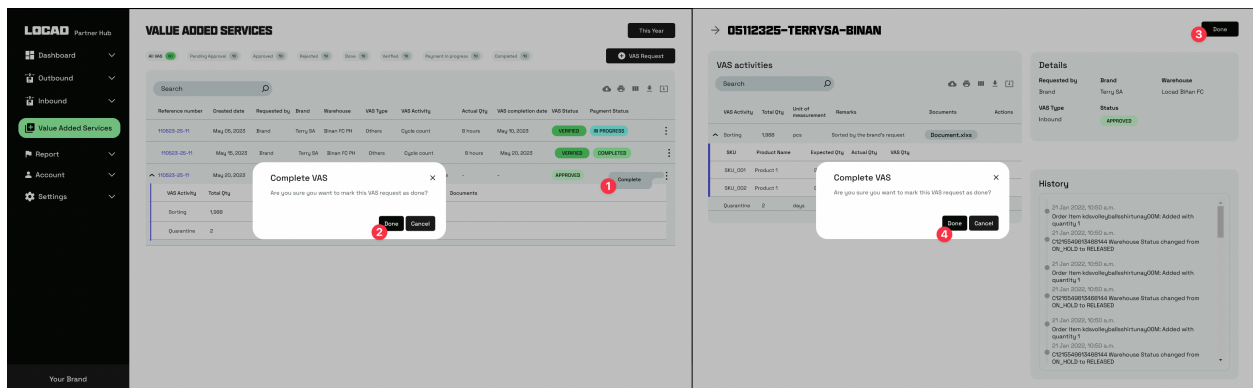

To complete VAS, you can either:

Go the **VAS listing page** and do the following:

1. Click the kebab icon and select Complete.
2. In the confirmation modal, click the Done button.

Go the **individual VAS page** and do the following:

3. Click the Done button.
4. In the confirmation modal, click the Done button.

III. Verify VAS

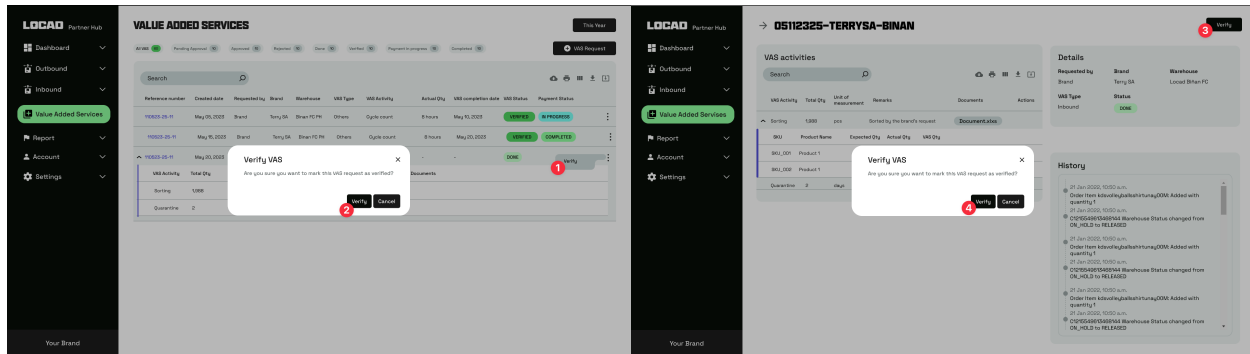

To verify the VAS, the CT/Ops dev team can either:

Go the **VAS listing page** and do the following:

1. Click the kebab icon and select Verified.
2. In the confirmation modal, click the Verify button.

Go the **individual VAS page** and do the following:

3. Click the Verify button.
4. In the confirmation modal, click the Verify button.

III. Billing and payment flow

Once the status is verified, it will go to Payment in Progress.

1. In the VAS activities table, the Qty billed to Locad and Qty billed to brand columns will be added.

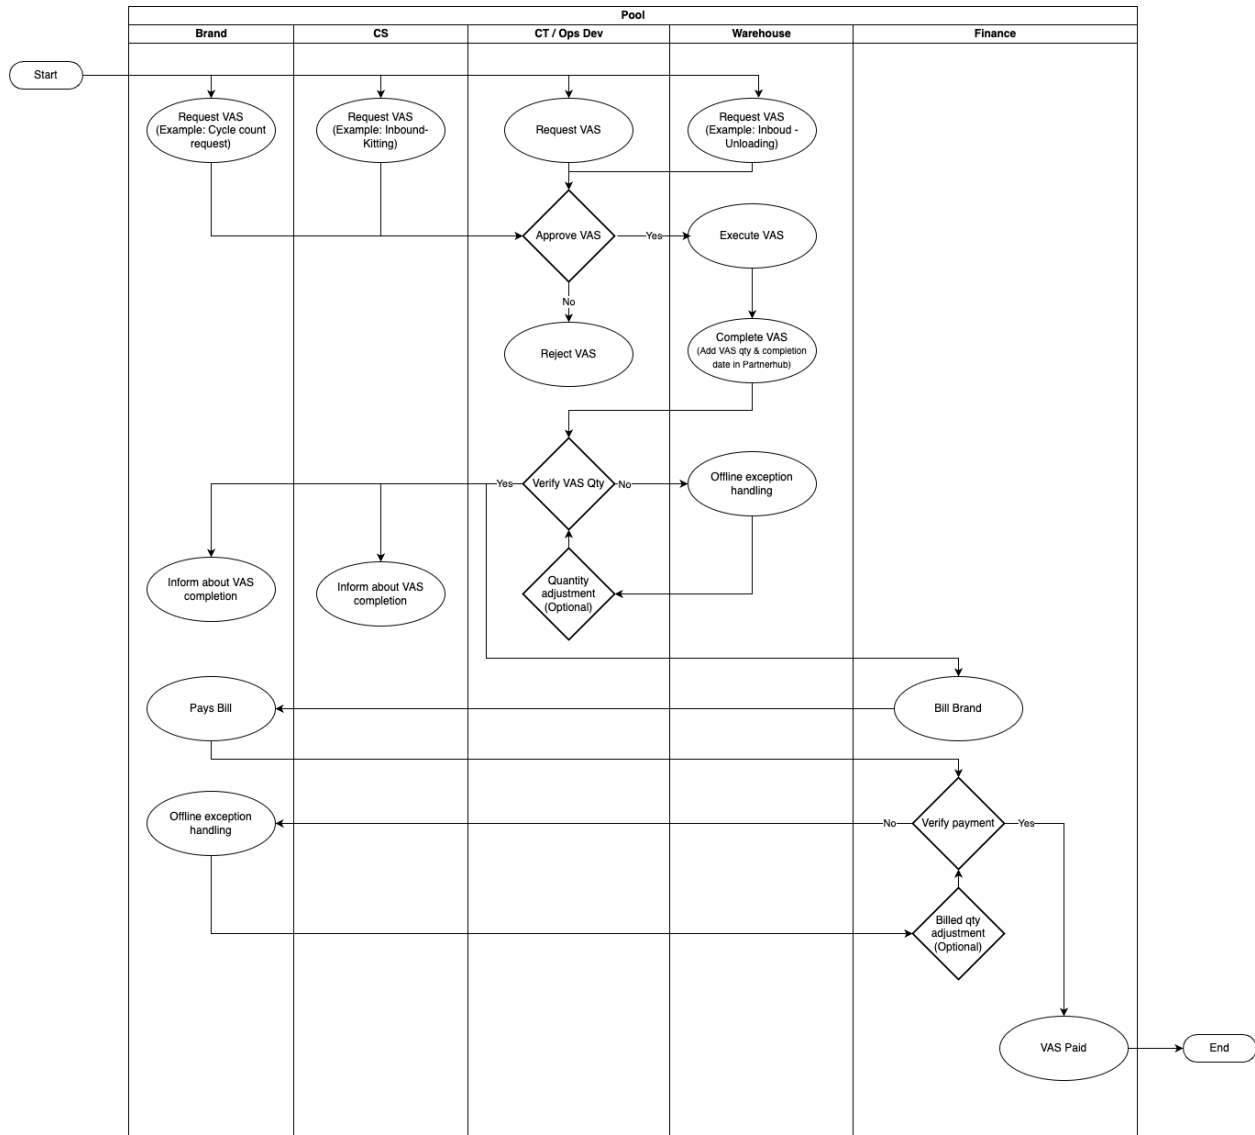

2. Payable by can have the following values:

Payable by	Qty billed to Locad	Qty billed to brand	Description
Brand	0	Total VAS qty	Locad will bill the brand, but warehouse will NOT bill Locad
Locad	Total VAS qty	0	Locad will NOT bill the brand, but warehouse will bill Locad
Brand & Locad	Total VAS qty	Total VAS qty	Locad will bill the brand and warehouse will bill Locad

- Brand - Locad will bill the brand, but warehouse will NOT bill Locad
- Locad - Locad will NOT bill the brand, but warehouse will bill Locad
- Brand & Locad - Locad will bill the brand and warehouse will bill Locad

3. During the payment in progress status, there will be two sub statuses which are

- a. Brand payment status
 - i. Billed - brand was billed by Locad
 - ii. Paid - brand paid Locad
- b. Locad payment status
 - i. Billed - warehouse billed Locad
 - ii. Paid - Locad paid warehouse

▼ Notes

Phase 1: Page will solely be accessible by Locad.

Phase 2: We should make the records viewable/editable for the warehouses that have access AND what level of permission of his role of the warehouse. (If phase 2 can be worked on with minimum additional effort, we should cater.)

▼ Suggestions

- In complete inbound modal, add VAS status
- Add VAS status in inbound history status page

- Add VAS status in inbound page
- When VAS qty is different from requested qty
 - Workflow for Actual qty when warehouse does the VAS

ASN/VAS completion flow

If there's an VAS for that ASN, it should be completed first before

Type	From	To	Trigger	Remarks
ASN	-	ASN_DRAFT		
ASN	ASN_DRAFT	ASN_PENDING		
ASN	ASN_PENDING	ASN_APPROVED		
ASN	ASN_APPROVED	IN_PROGRESS		
VAS	-	Pending approval	Every new request is set to 'Pending approval' automatically	
VAS	Pending approval	Approved	The CT/Ops Dev team has marked it as approved	
VAS	Pending approval	Rejected	The CT/Ops Dev team has marked it as rejected	
VAS	Approved	Done	The warehouse team has marked it as Done	
VAS	Completed	Verified	The CT/Ops dev team has marked it as verified	
	IN_PRORESS	COMPLETED
